U.S. DAILY NEWSPAPER NEWSPRINT CONSUMPTION BY STATES

ANPA figures show newsprint consumption in 1978 by states for 1,773 daily newspapers was 8,411,207 tons. This represents 77.4% of the estimated 1978 total consumption of 10,872,000 tons by all users including commercial printers, shopping news and free distribution publications, comic publications, the government, etc. This survey includes some foreign language newspapers, college newspapers and special service dailies.

NEWSPRINT CONSUMPTION BY OFFSET NEWSPAPERS IN THE U.S.

ANPA has compiled 1978 newsprint consumption figures for daily newspapers in the United States published by offset. A list of newspapers published by offset in 1978 is contained in ANPA/RI Bulletin 1315, April 18, 1979.

These 1,283 daily newspapers consumed a total of 2,017,671 tons of newsprint in 1978. This represented 18.6% of the total 1978 estimated newsprint consumption of 10,872,000 tons. Consumption totals by states follow:

Alabama	23,331	Montana	11,783
Alaska	9,568	Nebraska	9,896
Arizona	26,082	Nevada	16,297
Arkansas	15,734	New Hampshire	3,839

PUBLISHERS AND MILL STOCKS OF NEWSPRINT

U. S. publishers stocks of newsprint represent stocks on hand in city of publication and in transit (that is tonnage already billed by the mill to the publisher) at the end of month, as reported to ANPA by the publisher. "Days Supply" represents the number of days the stocks on hand and in transit will last, based on average consumption during the month covered by the report. In other words, "Days Supply" at the end of the month means the amount of newsprint in possession of the publishers and in transit calculated to run at the rate of consumption in that month.

"Mill Stocks" represent total stocks at all United States and Canadian mills reporting to the American Paper Institute and the Canadian Pulp and Paper Association. This also includes tonnage at destination warehouse not yet invoiced to customers.

1979 NORTH AMERICAN NEWSPRINT MILL CAPACITY IS 14,254,457 TONS

Based on reports of the Canadian Pulp and Paper Association, American Paper Institute and the American Newspaper Publishers Association, preliminary North American newsprint mill capacity for 1979 is 14,254,457 tons, an increase of 249,063 tons or 1.8% from the 1978 capacity of 14,005,394 tons.

1979 Canadian Newsprint Mill Capacity is 10,050,000 Tons

The Canadian Pulp and Paper Association reported that preliminary Canadian rated newsprint capacity in 1979 is 10,050,000 tons, an increase of 188,600 tons or 1.9% over 1978 when Canadian capacity was 9,861,400 tons. Capacity for the production of newsprint is based on past performance.

Following is a list of all Canadian newsprint producers, showing preliminary rated mill capacity in 1979 compared with 1978 as revised by CPPA.

NEWSPRINT CONTRACT PRICES SINCE JAN. 1, 1970

The following is only a general listing of newsprint contract prices per short ton for the U.S. since January 1, 1970. In some years there were various exceptions as to prices and effective dates. Prices are for 32 lb. newsprint except as noted. Beginning 1974 prices are for 30 lb. only.

Year	East	Effective	West	Effective
1970	152_2	Jan. 1	$147	Jan. 1
	151	Jan. 1		
1971	160_2	April 1		
	158	April 1	155	Jan. 1
1972	165_2	Feb. 1		
	163	March 1	163	Jan. 1
1973	170_2	Feb. 1		
	168	Feb. 1	168	March 1

1979	375	Oct./Nov. 1	375	Oct. 1

SPECIFICATIONS FOR DUTY-FREE STANDARD NEWSPRINT PAPER

Following are the current specifications for duty-free standard newsprint as prescribed in T.D. 56349, published in Federal Register Jan. 28, 1965 by the U.S. Treasury Department:

The test for determining whether a paper is classifiable as standard newsprint paper under Item 252.65 is whether at the time of its importation the paper is of that class or kind chiefly used in the United States in the printing of newspapers.

Chief use is determinable by the use in the United States at, or immediately prior to, the date of importation, in accordance with General Interpretive Rule 10(e) (i) of the General Headnotes and Rules of Interpretation of the Tariff Schedules of the United States, which provides:

10(e) In the absence of special language or context which otherwise requires—

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use; i.e., the use which exceeds all other uses (if any) combined;

The Bureau is presently of the opinion that most papers which conform to the following descriptive specifications:

Weight:	500 sheets each 24 by 36 inches not less than *28-1/2 pounds nor more than 35 pounds (per ream of 432,000 square inches.)
Size:	Rolls not less than 13 inches wide and 28 inches in diameter. Sheets not less than 20

---

[1] Southern Price

[2] Canadian produced newsprint

[3] Price for some companies

[4] Applies to companies who did not announce Nov./Dec. 1976

* Revised by T.D. 68-265 (20) Oct. 1, 1968. Formerly 30 pounds.

Thickness:	Not over .0042 inch.
Sizing:	Time of transudation of water shall be not more than 10 seconds by the ground glass method.
Ash Content:	Not more than 6.5 percent.
Color and Finish:	White; or tinted shades of pink, peach or green in rolls; not more than 50 percent gloss when tested with the Ingersoll glarimeter.

are of that class or kind of papers chiefly used in the printing of newspapers in the United States and are, accordingly, classifiable as standard newsprint paper under Item 252.65, Tariff Schedules of the United States, so long as the existing conditions of chief use prevail.

In the event it is established that a type of paper not conforming to the foregoing descriptive specifications is chiefly used in the United States within the meaning of General Interpretative Rule 10(e) (i), quoted above, in the printing of newspapers in the United States additional descriptive specifications will be announced.

• • •

Mar. 4, 1965, T.D. 56369 (34) Newsprint. Significance of pulp in classification as standard newsprint under Item 252.65, TSUS and T.D. 56349. Chief use-In view of controlling effect of doctrine of chief use in classification of standard newsprint paper under Item 252.65, TSUS, as outlined in T.D. 56349, the kind of pulp used in the manufacture of a paper is not in and of itself determinative of its position under Item 252.65. If the paper, irrespective of the kind of pulp used, is in fact chiefly used in the printing of newspapers in the United States under the principles of General Headnote 10(e) (i), classifiable as standard newsprint paper under Item 252.65.
